

## PRQ-451/D/H SERIES

### DESCRIPTION :

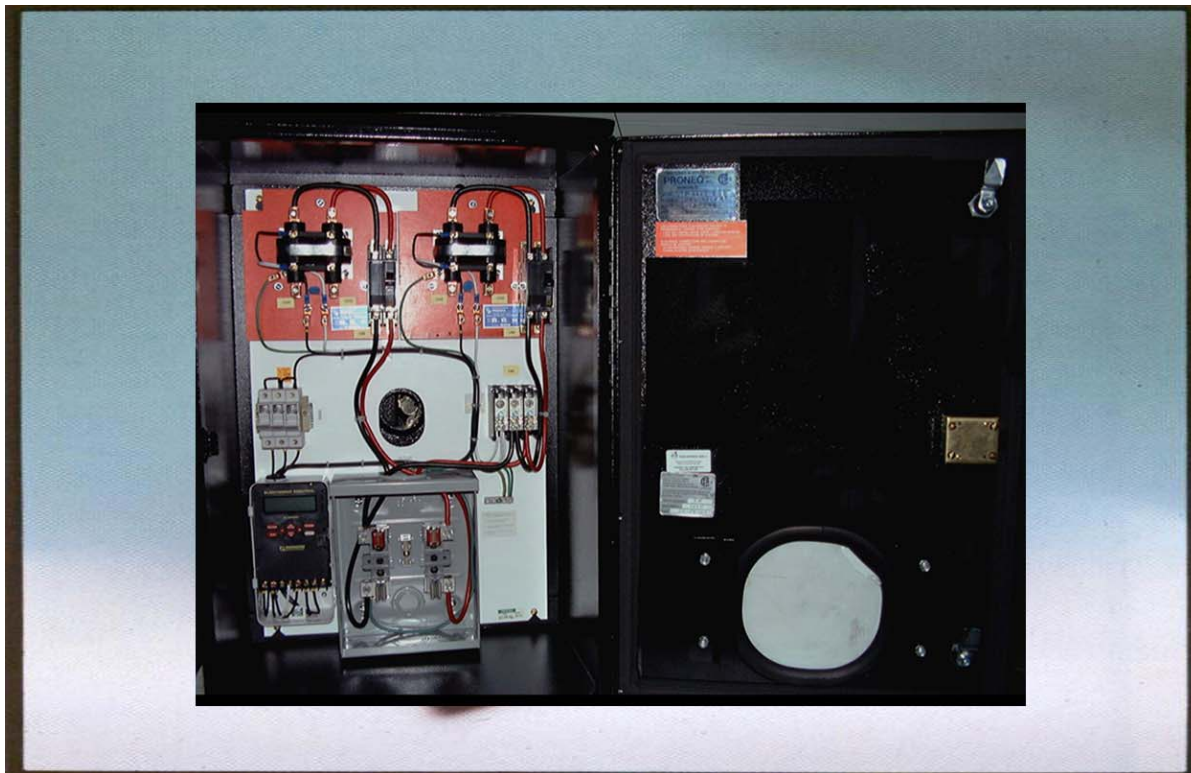

The mercury lighting relays for Streets lighting series PRQ-450 are perfectly appropriate for the applications where several sources of light must be controlled starting from a simple photocell. Moreover, they offer a greater capacity and a life expectancy thanks to the new chemical composition of mercury contained in the cell's contact.

The astronomic clock allows an appreciable energy saving, being independent of the seasons. It can be set to start at Sunset and stop at Sunrise.

### SPECIFICATIONS:

Astronomic clock	Double Pole
Base meter H. - Q.	The contacts do not stick
Fuse on the control system	Resist severe climatic conditions
Easy access to the circuit breaker	UL and ULc enclosure Nema 3R
Temperature of operation: -31 TO 130 Degree F	Available for 24 / 208 / 277 / 480 Volts
Lighting protection	Available contact s N.O and N.C
Quiet operations	Lock is Corbin type
No bouncing of contact	Coded wire

### (2) 60 AND 90 AMP

1420-C, De Coulomb St Boucherville Quebec J4B 7K2

Phone : (450) 449-2524 Fax : (450) 449-2625
